

```

import 'package:flutter/material.dart';

class MyHomePage extends StatelessWidget {
  const MyHomePage({super.key});

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(
        title: Text("Stateless Example"),
      ),
      body: Center(
        child: SingleChildScrollView(
          child: Column(
            children: [
              // Text widget
              Text(
                "Hello Flutter!",
                style: TextStyle(fontSize: 24),
              ),
              SizedBox(height: 20),
              // Elevated Button widget
              ElevatedButton(
                onPressed: () {},
                child: Text("Click Me"),
              ),
              SizedBox(height: 20),
              // Icon widget
              Icon(
                Icons.favorite,
                size: 40,
                color: Colors.red,
              ),
            ],
          ),
        ),
      ),
    );
  }
}

```
